Subject: HV Sampling in Newark Bay next week

Hello everyone,

We will resume our High Volume sampling in Newark Bay stations next week.

Tuesday – sampling Newark Bay South with an EPA split (including 10L post-PUF filtrate sample) and sampling Newark Bay Northeast. We will be meeting sometime in the morning.

Wednesday – sampling Kill van Kull including a field duplicate. This will, per the QAPP, be conducted on an incoming tide (low is at 12:45; high at 19:00), so the day will be a late one.

Thursday – collection of 2 equipment blanks in the morning.

We are working on times. All vessels will be out of the Liberty Landing Yacht Club.

We welcome oversight, but cannot, as on LPRSA, accommodate an additional person on the vessel. We will have a runner vessel on Wednesday should Tierra wish to join. We can be close, but the captain will make the ultimate decision if we can tie up. All are welcome to watch the EB on Thursday (at LLYC).

AmyMarie, do you have the list of bottles, sample IDs and other such information for the internal chain-of-custody we'd worked on?

I'm available any time to discuss coordination of this effort, and will provide meeting times as soon as OSI has worked them out.
